

A NEWSLETTER TO PROVIDE CHRISTIANS WITH UP-TO-DATE INFORMATION ABOUT THE CREATION/EVOLUTION ISSUE AND PROGRESS ON THE CREATION MUSEUM

THE TRUTH WILL PREVAIL

We are happy to announce that Dr. John Morris, President of the Institute for Creation Research headquartered in Dallas, Texas, will be the keynote speaker at our **Pastors' Conference and Luncheon** on Thursday, January 28, 2010. If you are a pastor, associate, or teaching staff member, and are interested in attending, please call our toll free number at 1-866-771-

8783 and register your name and number of attendees. Space is limited. The free conference and luncheon will be held at South Creek Church, 3145 West Republic Road, Springfield, MO. Doors open at 11.00 a.m.

Dr. Morris is a world renowned speaker and explorer who has led over a dozen expeditions to Mount Ararat in search of Noah's Ark. As a Ph.D. geologist Dr. Morris explains the truth about what the rocks really tell us and the evidences that the secular world ignores because they do not fit in with their evolutionary beliefs.

This conference will also include a demonstration on how to minister the truths of creation and biblical origins to the young, a testimony of a former atheist and evolutionist, special music, and a challenge to support the vision for a creation museum/ministry in the Branson, Missouri area that will be a daily witness to the truths and authority of the Bible.

PLEASE JOIN US AT THIS SPECIAL CONFERENCE AND LUNCHEON JANUARY 28 BY REGISTERING AT WWW.CREATIONMUSEUMOTO.ORG OR CALLING TOLL FREE 1-866-771-8783 (TRUE)

Contact Dr. Butterworth to hold a meeting or series of meetings at your church or group.

A SIGNIFICANT QUOTE FROM A FEMALE COLLEGE GRADUATE

“Kids quickly learn that the church avoids questions about origins and the age of the earth. But, they have no problem getting all their questions answered at school. Guess who they eventually come to believe?”

THE ROCKS HAVE A STORY TO TELL

by Rod Butterworth

MT. EVEREST

In mountains all over the world, and in modern days when hills are cut through for highways, we can see the many layers of rock piled on top of one another (called strata) as in the picture above. Many Christians have not realized how these layers give support and confirmation to a particular historical event as recorded in the Bible.

The event I am referring to is, of course, the great flood of Noah's day recorded in the Book of Genesis. According to the biblical account, this flood was global, covering the whole of the earth's surface which included the highest mountains, and took place about 4,500 years ago. Someone may ask, "How could a worldwide flood cover mountains as high as Mt. Everest?" Interestingly, the fact is, that Mt. Everest also has these layers which include thousands of marine fossils at its summit.

How can this geological fact be explained? Well, evolutionists who attempt to explain everything without taking the Bible's history into account,

would say that there were thousands of floods over millions of years, and over time the present-day mountains which were covered by oceans at one time have now been uplifted or raised to their current heights. We are told that Mt. Everest is still creeping upward by a few inches each year.

Christian geologists who believe in creation have a different explanation. The layers of rock were all laid down under water while still a muddy, gritty mix before they solidified in the form we see them today. Today's mountains were considerably lower at the time of the flood, which explains how the entire earth could be covered. The earth today is still 70% covered by water.

Many young-earth creationist geologists believe the evidence from the layers demonstrates that they were laid down in sequence during the one year of Noah's Flood, and do not represent millions of years of accumulation. In fact, the sharp lines distinguishing and separating the layers make it clear that there could not have been long periods of time between the laying down or deposition of each layer. If such had been the case there would surely be evidence of erosion between the layers, and there would not exist the sharp lines of separation.

Yes, if we start with knowledge of the Bible's history, we will be more likely to arrive at the truth—truth that is both biblical and confirmed by what we observe today.

In Matthew 24:37—39 Jesus referred to Noah's Flood as a real historical event. It was the judgment of God upon wicked humanity of that day. The rocks bear testimony to this event. The Bible's history is true.
